# 1. Rashel Miracle Peel

## **LOOK 5-10 YEARS YOUNGER IN 2 WEEKS**

### **A face peel treatment for aging, acne-prone and discolored skin**

This product delivers a serious punch – but you might need to adjust the recommended two-week application. I have combination skin and couldn't complete the required 14 day sequence. I still got the results, but my face needed 2 “mini breaks”. So my recommendation is to use, but listen to your skin. If it's too harsh (especially if you're doing in the winter months), take a day off, or use only on cheeks/chin if your forehead is peeling.”

#### **PROS:**

- Results are visible and the product definitely delivers results
- You'll see brighter, smoother skin
- Skin looks younger, with smaller pores

#### **CONS:**

- Redness and peeling are common and to be expected. While this product really works, you're also very red/dry for a two week stint. Keep that in mind when choosing your start/end date.

## 2. Midnight Dream (Night Cream)

Targets the signs of aging and fatigue around the eyes including dark circles and puffiness. – It helps minimize pores and improves skin texture too.

### **3. Soft Shield**

**Daily Soft Shield (SPF30) is a moisturizer for all skin types. It contains a sun filter for protection against UVA and UVB rays.**

Come summer and we all rush to the nearest cosmetic or medical store to grab that bottle of sunscreen lotion, don't we? However, applying sunscreen should never be restricted to summer alone. Summer or winter, monsoon or spring, the need for shielding your skin from the harsh rays of the sun is essential. And, sunscreen does that job for you.

**Shields from Harmful UV Rays:** The continuously depleting ozone layer has put us at a higher risk of getting affected from the harmful rays of the sun. While you do need the sun for your daily dose of Vitamin D, it does not imply that you should put your health at risk! Applying sunscreen actually blocks these harmful rays from penetrating the skin and triggering skin disorders.
